turn the night into  
a magical place of  
beauty and radiance

When the sun begins to set, your landscape will come to life with an outdoor lighting plan that has been designed and installed by Lawnco. Soft lights grazing over a facade, focused path lighting for ease of navigation and accents on specific focal landscape elements will turn your home into a stunning oasis of light.

## design and installation

Whether you are starting from the beginning or adding some supplemental light to an existing plan, Lawnco can help you make decisions that will increase the beauty, security, flexibility and value of your home. A Lawnco team of professionals will design and install your lighting system with the same care and expertise that is used when designing and installing your landscape, always keeping your interests and desires at the forefront.

## service

As the landscape matures, lighting may need to be adjusted to take full advantage of the changing environment. Scheduled maintenance to review and adjust light intensity and angles due to maturing plantings and local light pollution will keep your landscape looking great. Lawnco can also review the status of any existing lighting for safety and efficiency and make repairs as necessary.

**Start enjoying your landscape 24/7.** Just give us a call to schedule a consultation to discuss how we can make your landscape radiant with the flip of a switch. **502 423 9297**
